

Please keep this a country of the people, not of special interest groups. Since I got on the Wisconsin no-call list, my home has become a less stressful place. Telemarketers don't care how many times one doesn't answer their call, they just keep on trying. Every individual has the right to not be badgered in his own home. If I want goods or services, I will seek them out. Please do not let the no-call list become weakened because of the almighty dollar. Keep American homes from being assaulted by these Orwellian tactics.
